SUMMARY

Over 4+ years of experience in MuleSoft development, specializing in API-led connectivity, Mule 4, and DataWeave. I've worked on end-to-end API development, integrating multiple systems like Salesforce and databases, and deploying APIs on Anypoint Platform. I also have experience with CI/CD, security, and performance optimization.

TECHNICAL SKILLS

Technologies: MuleSoft, Java (Basics), SQL (Basics)

MuleSoft Platform: RAML, API Designer, API Manager, Runtime Manager, Exchange

Tools: Anypoint Studio, Azure DevOps, Insomnia, Splunk, GitHub, Postman

PROFESSIONAL EXPERIENCE

- Experienced in MuleSoft API development using RAML 1.0, implementing secure REST APIs with Client ID Enforcement and Auto Discovery.
- Strong knowledge of synchronous and asynchronous integration patterns, including Publish–Subscribe (Pub-Sub) models for scalable messaging solutions.
- Proficient in building robust error handling frameworks, reusable utilities, and logging frameworks for better traceability and monitoring.
- Skilled in DataWeave transformations, XML to JSON conversion, and file-based integrations.
- Hands-on experience in batch processing and Salesforce integrations, ensuring efficient handling of large datasets.
- Adept at MUnit testing (75%+ coverage) and improving code quality using SonarQube.

WORK EXPERIENCE

KCC_Mulesoft Migration

Technologies : Any Point Studio, Any Point Platform, Insomnia, SQL DB, Salesforce, Splunk, Git.

Role: MuleSoft Developer

Duration: July 2025- June 2026

Client: Kimberly Clark

Description:

Working on a migration project to transition enterprise integrations from MuleSoft to Node.js. Responsible for analysing MuleSoft applications, documenting architecture, and creating mapping sheets. Provided deep technical and business knowledge transfer to the Node.js team and mentored shadow analysts. Ensured accurate translation of Dataweave (DWL) logic and supported end-to-end understanding of legacy code.

- Analyzed existing MuleSoft integration flows and identified migration requirements.
- Developed comprehensive documentation for existing MuleSoft integrations, including DataWeave scripts, API specifications, and flow diagrams.
- Created and maintained Postman collections for API testing and validation.
- Extracted and analyzed logs to ensure data integrity and troubleshoot issues.
- Collaborated with the Java development team to translate MuleSoft integration logic into Java-based solutions.
- Provided detailed explanations and walkthroughs of MuleSoft flows to the Java development team.
- Ensured seamless data migration and system interoperability during the transition phase.

Teck Resources :

Technologies : MuleSoft, Anypoint Platform, Anypoint Studio, Postman, ActiveMQ, SonarQube.

Role: MuleSoft Developer

Duration: August 2024 - Jan 2025

Description:

TECK is one of Canada's leading mining companies committed to responsible mining and mineral development with major business units focused on copper, zinc and steelmaking coal, as well as investments in energy assets.

- Worked on different HRIS Integrations using Anypoint Platform in which we have developed different APIs based on API-LED connectivity.
- Working knowledge on how to generate SonarQube report using SonarQube tool after developing APIs based on rules created for TECK.
- Used different connectors like HTTP, Database, File, Anypoint MQ & Choice router.
- Have Good Knowledge on Pub-Sub Model and Queuing mechanism using Anypoint MQ.
- Have Good Knowledge on Circuit Breaker mechanism.

DT_Integration_Migration

Technologies : Any Point Studio, Any Point Platform, Insomnia, SQL DB, Salesforce, Splunk, Git.

Role: MuleSoft Developer

Duration: August 2023- June 2024

Client: Discount Tire

Description:

The DT_Integration_Migration project involved migrating Discount Tire's existing integration solutions from MuleSoft to a Java-based platform. As a MuleSoft Developer, I played a key role in analyzing the existing MuleSoft integration flows and identifying the requirements for migration. I developed comprehensive documentation, including DataWeave scripts, API specifications, and flow diagrams, to ensure a smooth transition.

- Analyzed existing MuleSoft integration flows and identified migration requirements.
- Developed comprehensive documentation for existing MuleSoft integrations, including DataWeave scripts, API specifications, and flow diagrams.
- Created and maintained Postman collections for API testing and validation.
- Extracted and analyzed logs to ensure data integrity and troubleshoot issues.
- Collaborated with the Java development team to translate MuleSoft integration logic into Java-based solutions.
- Provided detailed explanations and walkthroughs of MuleSoft flows to the Java development team.
- Ensured seamless data migration and system interoperability during the transition phase.

Education

- B.E. 2021 – Guru Nanak Dev Engineering College, Bidar

Courses & Certifications

- MuleSoft Certified Developer - Level 1 (Mule 4)
- AWS CLF-001
- Ocean Assessment (Mulesoft)
- Agile Methods

Personal Information

- Date of Birth: 25-08-1999
- Gender: Female
- City: Bangalore
- Country: India
